DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

a. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kanai (U.S. Patent 5,824,921).

Kanai discloses a method and a test system for testing plurality of heat pump having array of testing station, plurality of data acquisition lines, plurality of control lines, a control device, control mean receives test data through the data acquisition lines and transmit control data (col. 1-2, lines 35-59, fig. 1-5), test on a compressor, evaporator (col. 2, lines 14-20), use of temperature sensor (col. 11, lines 35-45), automated testing protocol running on a pass/fail criteria computer system, report of the results (fig. 1, 6, 9, 12), a external valve for the testing of the unit (col. 20, lines 16-25).

Kanai does not disclose a plurality of heating element attachment on the heat pumps to change the temperature, Kanai does disclose a temperature changes in the heat pump can affects the performance of the unit (col. 10, lines 1-12),

Kanai measures the temperature of the unit (col. 11, lines 35-45), Kanai would have anticipated the adding of an extra heating elements to change the temperature of the heat pump and measure its performance.
